Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9,11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers et al. (6,846,313) in view of Yeung et al. (6,530,933).

With respect to claims 1,5,9, Rogers et al disclose a bioabsorbable medical device (2,3,5) comprising a first bioabsorbable contact surface (28) a second bioabsorbable contact surface; as best seen in FIG.1 (outer surface of the pin) wherein the first and second contact surfaces are moveable with respect to each other; as set forth in column 5, lines 1-67, column 2, lines 1-67, and as best seen in FIGS.1-7. The device made of bioabsorbable copolymers and blend thereof, as set forth in columns 6-7, lines 1-67, columns 8-9, lines 1-67, columns 9-11, lines 1-67.

Although in column 8, lines 25-34, Rogers et al teach of a dye (coating) added to the device, it is noted that Rogers did not teach of a coating, as claimed by applicant. However, in similar art, Yeung et al, column 35, lines 40-45, evidences the use of a lubricating coating to decrease friction during the operation of the device.

Therefore, given the teaching of Yeung et al, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Rogers, as taught by Yeung et al to decrease friction during the operation of the device.

With respect to claims 2-4,6-8,11-13, The above combination of references discloses all the limitations; as set forth in column 5, lines 1-67, column 2, lines 1-67, and as best seen in FIGS.1-7, as set forth in columns 6-7, lines 1-67, columns 8-9, lines 1-67, columns 9-11, lines 1-67 of Rogers et al. And, column 35, lines 40-45 of Yeung et al.

Response to Amendment

Applicant's arguments, see Remarks, filed 9/17/07, with respect to the rejection(s) of claim(s) 1-14 under 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Rogers/Yueng et al.

Conclusion

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
